July 7, 2008

To Whom It May Concern:

On this date a semen sample collected from "Kids Classic Style" was brought in to the clinic for freezing. The horse was collected at Halvorson Ranch by Wayne Halvorson and/or his crew. The sample contained 264ml of semen/extender extended 1:1, with a concentration of 115,000/ml. Therefore, the total sample contained 30.36 billion cells. Progressive motility was estimated at approximately 70%.

A handwritten signature in black ink, appearing to read 'Dee M. Gragg, DVM'. The signature is fluid and cursive, with a long horizontal line extending to the right.

Dee M. Gragg, DVM
